🎓 TRAINING

2019 - 2024:
Engineering degree (ENSIM)
Computer science specialty, People Systems Interaction option.

🌐 LANGUAGES

French (Native)
English (Linguaskill B2)

TECHNOLOGIES

- Languages** Python • C • Java • JavaScript • PHP • Kotlin
- Front end** Angular • React • Vue.js • Tailwind CSS
- Back end** Spring Boot • Symfony • Django • Node.js
- Database** MySQL • PostgreSQL • MongoDB • Firebase
- Mobile** android
- DevOps** Git/GitHub • Docker • Jenkins
- Web Services** SOAP • REST • GraphQL
- Software/Tools** Figma • Postman • WordPress • JIRA

PROFESSIONAL EXPERIENCE

- March 2024 - today: Software engineer (SQORUS)**
Participation in the development of a human resources management project by correcting problems reported by the client on existing programs and adding new functionalities to the solution, but also in the deployment of the latter.
- June - September 2023: Full Stack Developer (Moda Live)**
Participation in a SAAS project for trying on clothes in augmented reality via webcam by participating in both the development of the frontend and the backend, but also in the design of the user interface and the database.

ACADEMIC & PERSONAL PROJECTS

- Development of a skills visualization tool via a web dashboard designed to be interfaced with LMS.**
- Development of a web-based leaderboard allowing AI models to be compared and a ranking of the most efficient to be displayed in real time.**
- Development of a mobile application for sharing good deals found online and equipped with a real-time notification system.**
- Development of a chatbot for Telegram messaging allowing interaction with ChatGPT with memory of the conversation history.**
- Development of a website for a concierge service using MVC architecture in native PHP.**
- Development of a website intended for the reservation of video games on the client side allowing reservations and on the admin side allowing stocks and reservations to be administered.**

OTHER EXPERIENCES

- Passing and obtaining an Oracle certification on generative AI.**
- Participation in hackathons throughout my team and individual training.**
- Active involvement in an association at my school to connect students and professionals.**
